

HLS Demo & Training Center

Demo Center

The Demo & Training Center (DTC) is a fully functional Command and Control Communication Computerized Center (4C) with the capability of Concept of Operations (CONOPS) development and training.

Major HLS business areas:

- Border surveillance and protection
- Coastal surveillance and protection
- Critical infrastructure protection

Demonstration of fully functional sensors including:

- Detecting targets by one or more sensors
- Tracking targets
- "Slaving" of electro-optic sensors to radars
- Defining alerts zones
- Video management for debriefing and archiving
- Management of situational awareness picture
- Development, adaptations and tailoring of Command and Control Center software for customer needs and requirements.
- Multi - Sensor HLS
- Systems integration and test capability
- Training center for operations, operators and maintenance

- Radars (long and/or short range)
- Day/Night cameras with infrared technologies
- Advanced video analysis motion detection (VMD)
- Fence sensors
- Seismic sensors
