## On-the-move cellular tactical solution

# TAC4G

The TAC4G on-the-move cellular tactical solution is a modern and reliable tactical communication backbone connecting your legacy and future networks.

Its on-the-move continuous connectivity allows multimedia broadband C4I and combat features.

Preserved secure and immune network and no deployment required are the main specifications of this solution.

Standards based, this on-the-move cellular tactical solution provides open solution for military and public safety forces.

### Features

#### *Tactical smartphone and modem*

- User friendly
- Secure unit
- Supports 3G & 4G communications
- Standards based open-system
- Ruggedized and non-ruggedized devices

#### *On-the-move network*

- Man-pack & vehicle mounted mobile base station
- Single node level unit independence
- NodeMesh connectivity
- Multiple backhaul options
- No single point of failure

#### *Additional features*

- Use of commercial network infrastructure
- Secured remote office applications
- Supports user specific and off-the-shelf applications
- Connection to legacy networks

### Applications

- Military routine
- Low-intensity warfare
- Full-scale ops
- Special ops
- HLS/public safety
